

EUROMARINE SUMMER SCHOOL

“PulseOcean: Taking an interdisciplinary pulse on ocean under global change”

EUROMARINE NETWORK

EuroMarine

From genes to ecosystems in changing oceans

Network with a bottom-up approach to promote integrated and multidisciplinary research to address global challenges in the marine environment

EuroMarine Network

Who we are

EuroMarine is a member-based, interdisciplinary, collaborative network of European marine organisations and research institutes.

Our members

EuroMarine currently have *51 Full Members and 8 Invited Members from 22 countries*.

Our Mission

To support the identification and initial development of important emerging scientific topics or issues and associated methodologies in marine sciences, as well as to foster new services relevant to the marine scientific community.

What we do

As an interdisciplinary, international, collaborative network, EuroMarine plays a crucial role in creating and facilitating funding, training, networking and other opportunities for researchers and organisations working in marine research.

EuroMarine History

2004

- Three FP6 Networks of Excellence and their follow-up structures

2011

- New network designed by FP7 preparatory project

2014

- **Launch of the EuroMarine network**
42 Organisations, 19 Countries, 19 Activities

2015

- First General Assembly meeting
68 Organisations, 22 Countries, 18 Activities, **1st GA Meeting**

2017

- 3rd GA Meeting, Blue Science for Blue Growth event
74 Organisations, 23 Countries, 11 Activities, **23 Fellowships**

2019

- 5th GA Meeting, Cádiz, Spain
Operational launch of EuroMarine legal entity
2014-2017 summary report

2024

- 10th GA Meeting, Chioggia, Italy, **10th Anniversary EuroMarine**
New Consortium Agreement 2024-2033
Steering Committee renewal

EuroMarine Full Members Benefits

For Organisations

- ✓ Access for researchers to EuroMarine funding opportunities such as foresight workshops, working groups, training, and fellowships.
- ✓ Steer EuroMarine activities and decisions on future funding.
- ✓ Prioritised promotion of jobs and activities through the EuroMarine newsletter and social media channels.
- ✓ Authorship of EuroMarine policy proposals, such as the Ocean Manifesto.
- ✓ Participation in high level events to advocate for marine science.

For Individuals

- ✓ Inclusion in the Member's directory database, facilitating networking and collaboration with researchers from more than 20 countries.
- ✓ Professional development opportunities through EuroMarine funded grants.
- ✓ Access to the ECRs resources and networking activities provided by OYSTER.
- ✓ Opportunity to become a mentor to ECRs.

EUROPEAN MARINE
RESEARCH NETWORK

OYSTER Working Group

Created in 2018, OYSTER (Orienting Young Scientists of EuromaRine) is an **independent working group funded by the EuroMarine network**.

OYSTER is **dedicated to promoting and supporting opportunities for Early Career Researchers (ECRs) in marine science**.

Since its foundation, OYSTER has continually connected with similarly oriented groups and institutions to collaborate on common goals and actions.

OYSTER co-chairs :

Inês Filipa Cigarro Morão

Tiago Filipe da Silva Simões

Isabella Provera

Postdoctoral researcher at the Stazione Zoologica Anton Dohrn.
SZN - Sede Napoli

Keywords: Seagrasses, Assisted Evolution, Climate change

My research focuses on understanding, predicting and enhancing the capacity of seagrasses to face anthropogenic impact and climate change integrating molecular, physiological and morphological tools.

Member of Engagement & Networking team.

This recently established team (2025) aims to **enhance collaboration** and develop professional connections with experienced EuroMarine researchers and **other ECR organizations** working in marine sciences.

Our aim is to **co-create a Global Coalition of Youth Networks in Marine sciences** to strengthen connections and drive collective action.

OPPORTUNITIES

Euromarine funded activities

FUNDED ACTIVITIES

Foresight Workshops

EuroMarine Foresight Workshops (FSW) provide an opportunity for research teams to scope and collaborate on an existing or emerging topic in marine science research. Workshops should take an innovative, “horizon scanning” approach to their topic and should target a scientific publication as an intended outcome. (7,000€/grant approx.)

EuroMarine Summer School

The School is an opportunity to host a training workshop that will equip attendees with new knowledge and innovative approaches to address ocean challenges. (20,000€/grant approx.)

Long Term Scientific Working Group

EuroMarine promotes the establishment of inclusive and multidisciplinary Long-Term Scientific Working Groups. The aim of the Working Groups is to provide an open forum for discussion among EuroMarine members. (12,500€/grant approx.)

Travel Grants for supporting parental care

EuroMarine recognizes the importance of supporting parents in their professional development while ensuring their family responsibilities are accommodated. This call supports EuroMarine members who wish to participate in person at any relevant event and need to travel with their children. (200€/grant approx.)

OYSTER OPPORTUNITIES for ECR

Individual Fellowship Programme

EuroMarine provides individual fellowship grants to enable Early Career Researchers (ECRs) to attend a professional development activity of their choice.

ECR Cooperation project

The objective is to build networks within EuroMarine, bringing together ECRs through collaborative research projects. The call will support ECR from EuroMarine Full Member Organisations to undertake an original and collaborative research project.

Mentorship Programme

In 2020, the OYSTER group designed and developed a mentorship platform to allow European marine science Early Career Researchers (ECRs) to develop personal and professional connections with experienced EuroMarine researchers.

Early Career Resources

This database contains an overview of jobs, training courses and other opportunities that are relevant to marine science ECRs.

Event organization

58th EMBS (European Marine Biology Symposium)

EuroMarine supports NORD University in the promotion and organization of the 58th EMBS **assisting with website management, communications, and planning.**

Euromarine network can serve as a platform to support the organisation and dissemination of this symposium.

The Secretariat is available to assist with coordination efforts and communications.

EuroMarine Newsletter

EuroMarine has issued 176 Newsletters up to January 2025

EuroMarine Newsletter contains the latest news relevant to the marine sciences.

You can subscribe individually. Also reposted by SZN mailing list.
